In this report all dollar amounts are expressed in Canadian dollars unless otherwise stated. This report should be read in conjunction with the company's Annual Report on Form 10-K for the year ended December 31, 2012.

Statements in this report regarding future events or conditions are forward-looking statements. Actual results could differ materially due to the impact of market conditions, changes in law or governmental policy, changes in operating conditions and costs, changes in project schedules, operating performance, demand for oil and gas, commercial negotiations or other technical and economic factors.

The term "project" as used in this report does not necessarily have the same meaning as under Securities and Exchange Commission ("SEC") Rule 13q-1 relating to government payment reporting. For example, a single project for purposes of the rule may encompass numerous properties, agreements, investments, developments, phases, work efforts, activities and components, each of which we may also informally describe as a "project".

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

1. Basis of financial statement preparation

These unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles of the United States of America and follow the same accounting policies and methods of computation as, and should be read in conjunction with, the most recent annual consolidated financial statements filed with the U.S. Securities and Exchange Commission in the company's 2012 Annual Report on Form 10-K. In the opinion of the company, the information furnished herein reflects all known accruals and adjustments necessary for a fair statement of the results for the periods reported herein. All such adjustments are of a normal recurring nature. The company's exploration and production activities are accounted for under the "successful efforts" method.

The results for the three months ended March 31, 2013, are not necessarily indicative of the operations to be expected for the full year.

All amounts are in Canadian dollars unless otherwise indicated.

In the first quarter of 2013, the company increased the amount of its existing stand-by long-term bank credit facility from \$300 million to \$500 million with the maturity date unchanged. The company has not drawn on the facility. Also in the first quarter, to further support the commercial paper program, the company entered into an unsecured committed bank credit facility in the amount of \$250 million that matures in March 2014. The company has not drawn on this facility.

In February 2013, the company increased its long-term debt by \$1,595 million by drawing on an existing facility with an affiliated company of Exxon Mobil Corporation. The majority of the increased debt was used to finance the acquisition of a 50-percent interest in Celtic's assets and liabilities (see note 10 for further details).

10. Acquisition

Description of the Transaction: On February 26, 2013, ExxonMobil Canada acquired Celtic Exploration Ltd. (“Celtic”). Immediately following the acquisition, Imperial acquired a 50-percent interest in Celtic’s assets and liabilities from ExxonMobil Canada for \$1,608 million, financed by a combination of related party and third party debt (see note 6 for further details). Concurrently, a general partnership was formed to hold and operate the assets of Celtic. Celtic is involved in the exploration for, production of, and transportation and sale of natural gas and crude oil, condensate and natural gas liquids.

Recording of Assets Acquired and Liabilities Assumed: Imperial used the acquisition method of accounting to record its pro-rata share of the assets acquired and liabilities assumed. This method requires, among other things, that assets acquired and liabilities assumed be recognized at their fair values as of the acquisition date. The following table summarizes the assets acquired and liabilities assumed:

millions of dollars	
Cash	6
Accounts receivable	38
Materials, supplies and prepaid expenses	5
Property, plant and equipment (a)	2,045
Goodwill (b)	20
Total assets acquired	<u>2,114</u>
Accounts payable and accrued liabilities	62
Deferred income tax liabilities (c)	377
Other long-term obligations	67
Total liabilities assumed	<u>506</u>
Net assets acquired	<u>1,608</u>

- (a) Property, plant and equipment were measured primarily using an income approach. The fair value measurements of the oil and gas assets were based, in part, on significant inputs not observable in the market and thus represent a Level 3 measurement. The significant inputs included Celtic resources, assumed future production profiles, commodity prices (mainly based on observable market inputs), risk adjusted discount rate of 10 percent, inflation of 2 percent and assumptions on the timing and amount of future development and operating costs. The property, plant and equipment additions were segmented to the Upstream business, with all of the assets in Canada.
- (b) Goodwill was the excess of the consideration transferred over the net assets recognized and represents the future economic benefits arising from other assets acquired that could not be individually identified and separately recognized. Goodwill was recognized in the Upstream reporting unit. Goodwill is not amortized and is not deductible for tax purposes.
- (c) Deferred income taxes reflect the future tax consequences on the temporary differences between the amount of assets and liabilities recognized for financial reporting purposes and such amounts recognized for tax purposes. The deferred income taxes recorded as part of the acquisition were:

Property, plant and equipment	414
Total deferred income tax liabilities	<u>414</u>
Asset retirement obligations	(17)
Other	<u>(20)</u>
Total deferred income tax assets	<u>(37)</u>
Net deferred income tax liabilities	<u>377</u>

Actual and Pro Forma Impact of the Acquisition:

Revenues for Celtic from the acquisition date included in the company’s consolidated financial statement of income for the three months ended March 31, 2013 were \$9 million. After-tax earnings for Celtic from the acquisition date through March 31, 2013 were de minimis.

Transaction costs related to the acquisition were expensed as incurred and were de minimis in the three months ended March 31, 2013.

Pro forma revenues, earnings and basic and diluted earnings per share information as if the acquisition had occurred at the beginning of 2013 or the comparable prior reporting period is not presented, since the effect on Imperial’s consolidated first quarter 2013 financial results or the comparable prior reporting period, would not have been material.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OPERATING RESULTS

The company's net income for the first quarter of 2013 was \$798 million or \$0.94 a share on a diluted basis, compared with \$1,015 million or \$1.19 a share for the same period last year.

Lower first quarter earnings were primarily attributable to the impacts of lower liquids realization, higher refinery maintenance activities, lower volumes and higher maintenance costs at Syncrude and Kearl production readiness expenditures. These factors were partially offset by lower royalty costs due to lower liquids realizations and higher refining margins.

Upstream

Net income in the first quarter was \$300 million versus \$542 million in the same period of 2012. Earnings decreased primarily due to lower liquids realizations of about \$270 million. Other factors that contributed to lower earnings included lower volumes and higher maintenance costs at Syncrude totalling about \$75 million and Kearl production readiness expenditures of about \$50 million. These factors were partially offset by lower royalty costs of about \$160 million due to lower liquids realizations.

Prices for most of the company's liquids production are based on West Texas Intermediate (WTI) crude oil, a common benchmark for mid-continent North American oil markets. Compared to the corresponding period last year, the average WTI crude oil price in U.S. dollars was lower by \$8.67 a barrel, about eight percent, in the first quarter of 2013. Decreases in the company's average realizations in Canadian dollars on sales of conventional and synthetic crude oils were in line with WTI. The company's average bitumen realization in Canadian dollars in the first quarter of 2013 decreased 34 percent to \$43.63 a barrel. Supply/demand imbalances of heavier crude oils in mid-continent North American markets and industry pipeline apportionment effects widened the price spread between light crude oil and Cold Lake bitumen. The company's average realization on natural gas sales of \$3.50 a thousand cubic feet was higher by about 48 percent in the first quarter of 2013 versus the same period in 2012.

Gross production of Cold Lake bitumen averaged 164 thousand barrels a day and established a new production record in the quarter. Cold Lake production was up seven thousand barrels a day from the same period last year. Volume growth was achieved through higher reliability and strong reservoir performance.

The company's share of Syncrude's gross production in the first quarter was 65 thousand barrels a day, down from 74 thousand barrels in the first quarter of 2012. Higher maintenance activities were the main contributor to the lower production.

Gross production of conventional crude oil averaged 20 thousand barrels a day in the first quarter, versus the 21 thousand barrels in the corresponding period in 2012.

Gross production of natural gas during the first quarter of 2013 was 187 million cubic feet a day, down from 198 million cubic feet in the same period last year. The lower production volume was primarily the result of natural decline of conventional fields and the impact of divested properties partially offset by volume contributions from Celtic and the Horn River pilot.

On February 26, 2013, following the close of the acquisition of Celtic Exploration Ltd. ("Celtic") by ExxonMobil Canada, Imperial Oil completed its acquisition of a 50-percent participating interest in Celtic's assets and liabilities for \$1.6 billion. Reference is made to Financial Statement "Note 10: Acquisition" for further details.

On April 27, Imperial achieved a significant milestone with the start-up of the initial development of the Kearl oil sands project.

Downstream

Net income was \$478 million in the first quarter, \$23 million higher than the first quarter of 2012. Increased earnings were primarily due to the favourable impact of refining margins of about \$125 million partially offset by the impact of higher maintenance activities at the Sarnia refinery of about \$90 million. Earnings in the first quarter of 2012 included a gain of about \$15 million from the sale of assets.

Mid-continent North America industry refining margins continued to be strong in the first quarter of 2013. Stronger industry refining margins were the result of the widened differential between product prices and cost of crude oil processed.

Chemical

Net income was \$35 million in the first quarter, unchanged from the same quarter last year.

Corporate and Other

Net income effects from Corporate and Other were negative \$15 million in the first quarter, versus the negative \$17 million in the same period of 2012.

LIQUIDITY AND CAPITAL RESOURCES

Cash flow generated from operating activities was \$597 million in the first quarter, versus \$1,047 million in corresponding period in 2012. Lower cash flow was primarily due to lower earnings and working capital effects.

Investing activities used net cash of \$2,935 million in the first quarter, compared with \$1,064 million in the same period of 2012. \$1,602 million (excluding \$6 million cash acquired) was expended to complete the acquisition of a 50-percent participating interest in Celtic's assets and liabilities. Additions to property, plant and equipment were \$1,345 million in the first quarter, compared with \$1,145 million during the same quarter 2012.

Expenditures during the quarter were primarily directed towards the advancement of Kearl expansion project. Other investments included advancing the Nabiye expansion project at Cold Lake and sustaining capital for Syncrude mining and tailing projects.

Cash from financing activities was \$2,179 million in the first quarter, compared with cash used in financing activities of \$140 million in the first quarter of 2012. In the first quarter, the company increased its long-term debt level by \$1,595 million by drawing on an existing facility and issued additional commercial paper which increased short-term debt by \$687 million. The majority of the increased debt was used to finance the acquisition. Dividends paid in the first quarter of 2013 were \$102 million, \$9 million higher than the corresponding period in 2012. In the first quarter, the company increased the amount of its existing stand-by long-term bank credit facility from \$300 million to \$500 million with the maturity date unchanged. The company has not drawn on the facility. Also in the first quarter, to further support the commercial paper program, the company entered into an unsecured committed bank credit facility in the amount of \$250 million that matures in March 2014. The company has not drawn on this facility.

The above factors led to a decrease in the company's balance of cash to \$323 million at March 31, 2013, from \$482 million at the end of 2012.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Information about market risks for the three months ended March 31, 2013 does not differ materially from that discussed on page 23 in the company's Annual Report on Form 10-K for the year ended December 31, 2012 except for the following:

Earnings sensitivity (a) millions of dollars after tax		
Nine dollars (U.S.) a barrel change in crude oil prices	+ (-)	330
Ten cents decrease (increase) in the value of the Canadian dollar versus the U.S. dollar	+ (-)	570

The sensitivity of net income to changes in crude oil prices decreased from year-end 2012 by about \$12 million (after tax) a year for each one U.S. dollar change. The decrease was primarily a result of the impact of higher royalty costs for Syncrude and Cold Lake bitumen production due to higher prices for Syncrude and Cold Lake bitumen at the end of the first quarter of 2013.

The sensitivity of net income to changes in the Canadian dollar versus the U.S. dollar increased from year-end 2012 by about \$8 million (after tax) a year for each one-cent change, primarily due to the increase in crude oil commodity prices.

Item 4. Controls and Procedures.

As indicated in the certifications in Exhibit 31 of this report, the company's principal executive officer and principal financial officer have evaluated the company's disclosure controls and procedures as of March 31, 2013. Based on that evaluation, these officers have concluded that the company's disclosure controls and procedures are effective in ensuring that information required to be disclosed by the company in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is accumulated and communicated to them in a manner that allows for timely decisions regarding required disclosures and are effective in ensuring that such information is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

There has not been any change in the company's internal control over financial reporting during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Issuer Purchases of Equity Securities (1)

Period	(a) Total number of shares (or units) purchased	(b) Average price paid per share (or unit)	(c) Total number of shares (or units) purchased as part of publicly announced plans or programs	(d) Maximum number (or approximate dollar value) of shares (or units) that may yet be purchased under the plans or programs

- (1) On June 21, 2012, the company announced by news release that it had received final approval from the Toronto Stock Exchange for a new normal course issuer bid and will continue its share repurchase program. The new program enables the company to repurchase up to a maximum of 42,379,951 common shares, including common shares purchased for the company's employee savings plan, the company's employee retirement plan and from Exxon Mobil Corporation during the period June 25, 2012 to June 24, 2013. If not previously terminated, the program will end on June 24, 2013.

The company will continue to evaluate its share-purchase program in the context of its overall capital activities.

Item 4. Submission of Matters to a Vote of Security Holders.

At the annual meeting of shareholders on April 25, 2013, all of the management's nominee directors were elected to hold office until the close of the next annual meeting. The votes for the directors were: K.T. Hoeg 739,037,993 shares for and 1,231,718 shares withheld, R. M. Kruger 721,250,808 shares for and 19,024,883 shares withheld, J.M. Mintz 739,080,916 shares for and 1,188,775 shares withheld, D.S. Sutherland 739,229,928 shares for and 1,039,763 shares withheld, S.D.
